SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Skin irritation	Skin Irrit. 2 — H315
Eye irritation	Eye Irrit. 2 — H319
Skin sensitisation	Skin Sens. 1 — H317
Aquatic hazard, chronic	Aquatic Chronic 2 — H411

Classification according to Regulation (EC) No 1272/2008 [CLP], as given in the manufacturer's SDS (H315, H317, H319, H411); verified by Eco Candle Project with the CLP calculation method. Note on eye irritation: counting only components present at ≥ 1% (CLP Annex I, 3.3.3.3.1), the sum of eye irritants is 5.5% (< 10%); the manufacturer also takes into account eye-irritant components below 1% and classifies the pure fragrance Eye Irrit. 2 — H319. Eco Candle Project retains the manufacturer's classification, which is the more protective one. Note on reproductive toxicity: the manufacturer declares tetrahydrofurfuryl alcohol (Repr. 1B) at 0.30%, the value of the generic concentration limit (0.3%), and does not classify the fragrance for reproductive toxicity. Eco Candle Project follows the manufacturer's classification, which is based on the exact concentration in the formula (the declared value is rounded); confirmation of the exact value has been requested. The diluted preparations (≤ 25%) contain at most 0.075% and are not classified for reproductive toxicity in any case.
