SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 22/10/2026. Based on the manufacturer's SDS for the pure fragrance (revision of 15/02/2023, issued 15/02/2023), allergen declaration and IFRA 50th Amendment certificate (13/02/2023). The manufacturer declares component concentrations as ranges; the classification was calculated with the upper limit of each range, which coincides with the exact values of the manufacturer's allergen declaration and IFRA certificate (OTNE 13.1223%, hexyl cinnamal 9.5435%, linalool 2.7835%), and reproduces the manufacturer's classification of the pure fragrance (H315, H317, H411). The 10% preparation is consistent with the manufacturer's SDS for that dilution (H317, H412). The manufacturer has not issued SDSs for the 5% and diffuser preparations — these were calculated by Eco Candle Project with the CLP calculation method. Because the IFRA Category 10A limit is 18.28%, the diffuser preparation is issued at 18% in Augeo Clean Multi (Eye Irrit. 2 — H319) instead of 25%. Classification of the 18% preparation calculated by Eco Candle Project.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; HHCB = hexamethylindanopyran; SVHC = Substance of Very High Concern.
