

## CERTIFICATE OF CONFORMITY WITH IFRA STANDARDS

51st Amendment to the IFRA Code of Practice (published June 2023)

This certificate assesses the conformity of the fragrance mixture with IFRA Standards and provides restrictions for its use as necessary. It is based only on those materials subject to IFRA Standards for the toxicity endpoints described in each Standard and does not replace a comprehensive safety assessment of the fragrance mixture.

|            |                                                                                |
|------------|--------------------------------------------------------------------------------|
| Product    | LE SANTAL                                                                      |
| Issue date | 28/10/2026                                                                     |
| Base       | Manufacturer's IFRA Conformity Certificate, 51st Amendment (issued 12/07/2024) |

### COMPULSORY INFORMATION

We certify that the above mixture is in compliance with the Standards of the INTERNATIONAL FRAGRANCE ASSOCIATION (IFRA), up to and including the 51st Amendment to the IFRA Code of Practice (published June 2023), provided it is used in the following categories at a maximum concentration level of:

| IFRA Category     | Product type                                                                                                        | Maximum level of use (%) |
|-------------------|---------------------------------------------------------------------------------------------------------------------|--------------------------|
| IFRA Category 1   | Products applied to the lips                                                                                        | Not permitted            |
| IFRA Category 2   | Products applied to the axillae                                                                                     | 2.77%                    |
| IFRA Category 3   | Products applied to the face/body using fingertips                                                                  | 0.85%                    |
| IFRA Category 4   | Products related to fine fragrance                                                                                  | 50.40%                   |
| IFRA Category 5A  | Body lotion products applied to the body using the hands (palms), primarily leave-on                                | 12.85%                   |
| IFRA Category 5B  | Face moisturizer products applied to the face using the hands (palms), primarily leave-on                           | 1.12%                    |
| IFRA Category 5C  | Hand cream products applied to the hands using the hands (palms), primarily leave-on                                | 1.71%                    |
| IFRA Category 5D  | Baby creams, baby oils and baby talc                                                                                | 0.37%                    |
| IFRA Category 6   | Products with oral and lip exposure                                                                                 | Not permitted            |
| IFRA Category 7A  | Rinse-off products applied to the hair with some hand contact                                                       | 1.39%                    |
| IFRA Category 7B  | Leave-on products applied to the hair with some hand contact                                                        | 1.39%                    |
| IFRA Category 8   | Products with significant anogenital exposure                                                                       | 0.37%                    |
| IFRA Category 9   | Products with body and hand exposure, primarily rinse-off                                                           | 5.87%                    |
| IFRA Category 10A | Household care products with mostly hand contact — incl. reed diffusers, pot-pourri, liquid refills (non-cartridge) | 5.87%                    |
| IFRA Category 10B | Household care products incl. aerosol/spray products — incl. room sprays                                            | 12.64%                   |
| IFRA Category 11A | Intended skin contact, minimal transfer from inert substrate, without UV exposure                                   | 0.37%                    |

| IFRA Category     | Product type                                                                                                       | Maximum level of use (%) |
|-------------------|--------------------------------------------------------------------------------------------------------------------|--------------------------|
| IFRA Category 11B | Intended skin contact, minimal transfer from inert substrate, with potential UV exposure                           | 0.37%                    |
| IFRA Category 12  | Products not intended for direct skin contact — incl. candles of all types, wax melts, plug-ins, cartridge refills | No restriction (100%)    |

**Key uses for Eco Candle Project customers:** Candles and wax melts (Cat. 12) — no restriction. Reed diffusers (Cat. 10A) — maximum **5.87%** fragrance in the finished diffuser. Room sprays (Cat. 10B) — maximum 12.64%. Fine fragrance (Cat. 4) — maximum 50.40%.

#### IFRA-RESTRICTED MATERIALS PRESENT

| Substance                                             | CAS        | Concentration in fragrance (%) |
|-------------------------------------------------------|------------|--------------------------------|
| Tetramethyl acetyloctahydronaphthalenes (OTNE)        | 54464-57-2 | 39.679                         |
| Dihydro pentamethylindanone                           | 33704-61-9 | 2.214                          |
| Hexyl salicylate                                      | 6259-76-3  | 0.425                          |
| Linalool                                              | 78-70-6    | 0.071                          |
| Cedarwood oil terpenes and terpenoids                 | 11028-42-5 | 0.070                          |
| Dipentene                                             | 138-86-3   | 0.051                          |
| Dimethylcyclohex-3-ene-1-carbaldehyde (mixed isomers) | 27939-60-2 | 0.003                          |
| 2-Hexenal                                             | 6728-26-3  | 0.0003                         |
| Benzyl salicylate                                     | 118-58-1   | 0.0002                         |
| Benzyl benzoate                                       | 120-51-4   | 0.0001                         |

These limits may not be valid if the fragrance is used together with other materials containing the same restricted substances; the total concentration in the final product must be considered. For other applications or higher levels, a new safety evaluation may be needed. It is the ultimate responsibility of the customer to ensure the safety of the final product. This certificate is generated by calculation from ingredient data supplied by the manufacturer.
