SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 21/10/2026. Based on the manufacturer's SDS for the pure fragrance (revision of 24/07/2024, issued 24/07/2024), allergen declaration and IFRA 51st Amendment certificate (24/07/2024). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range (these upper limits coincide with the exact values of the manufacturer's allergen declaration and IFRA certificate), which reproduces the manufacturer's classification of the pure fragrance (H302, H315, H317, H361, H400, H411). The 5% and 10% preparations are consistent with the manufacturer's SDSs for those dilutions (25/07/2024: H412; H317, H411). The IFRA Category 10A limit (3.76%) does not allow a 25% reed-diffuser preparation; the diffuser SDS is therefore issued for 3% in Augeo Clean Multi.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; HHCb = hexamethylindanopyran; AHTN = 7-acetyl-1,1,3,4,4,6-hexamethyltetralin; SVHC = Substance of Very High Concern.
