SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 23/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 8 of 16/01/2025, issued 16/01/2025), IFRA certificate pending. The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range. In addition to the manufacturer's classification of the pure fragrance (H315, H317, H319, H411), this gives Aquatic Acute 1 — H400, because benzyl benzoate (up to 24.99%) and the other Aquatic Acute 1 components add up to more than 25%; Eco Candle Project keeps the more protective result. The acute oral toxicity estimate (about 6 075 mg/kg) was calculated from the LD50 values in the manufacturer's SDS (not classified). IFRA certificate and allergen declaration requested from the manufacturer.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.
