SECTION 16: Other information

Revision	Version 1.1 — Eco Candle Project edition, 04/11/2026. Based on the manufacturer's SDS for the pure fragrance (version 1.0 of 19/07/2024, issued 22/07/2024), allergen declaration and IFRA 51st Amendment certificate (22/07/2024). The manufacturer declares component concentrations as ranges; the classification was calculated using the upper limit of each range, which coincides with the exact values given in the manufacturer's IFRA certificate and allergen declaration (e.g. benzyl benzoate 40.54%, grapefruit oil 5.95%). The calculation reproduces the manufacturer's classification of the pure fragrance (H302, H315, H317, H400, H411); the manufacturer's label element H410 is not supported by its own classification (Aquatic Chronic 2) and is not used. The 5% and 10% preparations are consistent with the manufacturer's SDSs for those dilutions (H412). Because the IFRA Category 10A limit is 4.68%, the diffuser preparation was calculated at 4% in Augeo Clean Multi instead of 25%. Changes from version 1.0 (21/10/2026): the generic cut-off values of Regulation (EC) No 1272/2008, Annex I, Table 1.1 are now applied in the summation method for aquatic hazards (ingredients below 1 % — or 0.1 % ÷ M for Aquatic Acute 1 / Chronic 1 — are not taken into account). 4% preparation: H319, H412 → H319. Composition, other hazard classes and IFRA limits unchanged.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.
