SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 21/10/2026. Based on the manufacturer's SDS for the pure fragrance (revision of 01/08/2024, issued 01/08/2024), IFRA certificate pending. The manufacturer declares component concentrations as ranges; the classification was calculated using the upper limit of each range (conservative), which reproduces the manufacturer's classification of the pure fragrance (H317, H411). The manufacturer's SDSs for 5%, 10% and 25% dilutions are prepared in dipropylene glycol (a non-classified solvent) and give H412 + EUH208 (5%) and H317, H412 (10% and 25%); the 5% and 10% preparations calculated here in a non-hazardous base reproduce these classifications. The IFRA certificate and the allergen declaration for this formula have been requested from the manufacturer; the diffuser preparation in Augeo Clean Multi will be issued once the IFRA Category 10A limit is known.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; AHTN = 7-acetyl-1,1,3,4,4,6-hexamethyltetralin; SVHC = Substance of Very High Concern.
