SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 28/10/2026. Based on the manufacturer's SDS for the pure fragrance (revision of 12/07/2024, issued 12/07/2024), allergen declaration and IFRA 51st Amendment certificate (12/07/2024). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range (these coincide with the exact values of the manufacturer's IFRA certificate, e.g. OTNE 39.68%, hexyl salicylate 0.43%, dihydro pentamethylindanone 2.21%), which reproduces the manufacturer's classification of the pure fragrance (H315, H317, H410). The 5% and 10% preparations are consistent with the manufacturer's SDSs for those dilutions (H317, H412; H317, H411): OTNE, a skin sensitiser, is present at 1.98% in the 5% preparation, above the 1% classification limit. The IFRA Category 10A limit (5.87%) does not allow a 25% reed-diffuser preparation; the diffuser SDS is therefore issued for 5% in Augeo Clean Multi.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; AHTN = 7-acetyl-1,1,3,4,4,6-hexamethyltetralin; SVHC = Substance of Very High Concern.
