SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 21/10/2026. Based on the manufacturer's SDS for the pure fragrance (revision of 01/08/2024, issued 01/08/2024), IFRA 51st Amendment certificate (01/08/2024). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range (for hexyl cinnamal, benzyl benzoate, OTNE, (ethoxymethoxy)cyclododecane and benzyl alcohol this coincides with the exact values of the manufacturer's IFRA certificate), which reproduces the manufacturer's classification of the pure fragrance (H315, H317, H319, H411). The 5% and 10% preparations are consistent with the manufacturer's SDSs for those dilutions (H317, H412; H317, H412): with hexyl cinnamal at up to 20.99%, even the 5% preparation contains a skin sensitiser at $\geq 1\%$. The IFRA Category 10A limit (19%) does not allow a 25% reed-diffuser preparation; the diffuser SDS is therefore issued for 19% in Augeo Clean Multi.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; SVHC = Substance of Very High Concern.
