SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 21/10/2026. Based on the manufacturer's SDS for the pure fragrance (revision of 23/03/2022, issued 23/03/2022), allergen declaration and IFRA 50th Amendment certificate (23/03/2022). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range (these upper limits coincide with the exact values in the manufacturer's allergen declaration and IFRA certificate), which reproduces the manufacturer's classification of the pure fragrance (H315, H317, H319, H411). The manufacturer has not issued SDSs for diluted preparations — the classifications of the 5% and 10% preparations and of the 10% reed-diffuser preparation were calculated by Eco Candle Project with the CLP calculation method. The IFRA Category 10A limit (10%) does not allow a 25% reed-diffuser preparation; the diffuser SDS is therefore issued for 10% in Augeo Clean Multi.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; HHCB = hexamethylindanopyran; SVHC = Substance of Very High Concern.
