

## SAFETY DATA SHEET

PIÑA COLADA — fragrance compound, 100%

According to Regulation (EC) No 1907/2006 (REACH), Annex II, as amended by Regulation (EU) 2020/878

**⚠ RESTRICTED TO PROFESSIONAL USERS.** The pure fragrance contains lime oil, distilled (0.8%, Repr. 1A) and is classified Repr. 1A — H360. Under REACH Annex XVII (entry 30) it must not be supplied neat to the general public. The 5%, 10% and 7% preparations are below the 0.3% limit and are not classified for reproductive toxicity.

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

|                 |                      |
|-----------------|----------------------|
| Product form    | Mixture              |
| Trade name      | PIÑA COLADA          |
| UFI             | M9QW-14UW-700U-9MCH  |
| Type of product | Perfumes, fragrances |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|                      |                                                                                                                                                               |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Identified uses      | Fragrance compound for the manufacture of candles, wax melts, diffusers and air-care products. Restricted to professional users (REACH Annex XVII, entry 30). |
| Uses advised against | Not for personal use. Not for direct application to skin. Cosmetic use only within the IFRA limits and with a cosmetic safety assessment.                     |

#### 1.3 Details of the supplier of the safety data sheet

|         |                                                              |
|---------|--------------------------------------------------------------|
| Company | VEGTEAM, Lda. — Eco Candle Project                           |
| Address | R. Quinta de Santa Marta, Lojas EF, 1495-171 Algés, Portugal |
| E-mail  | info@ecocandleproject.com                                    |
| Website | www.ecocandleproject.com                                     |

#### 1.4 Emergency telephone number

|                  |                                                                  |
|------------------|------------------------------------------------------------------|
| Emergency number | CIAV — Poison Information Centre (INEM): +351 800 250 250 (24 h) |
|------------------|------------------------------------------------------------------|

### SECTION 2: Hazards identification

#### 2.1 Classification of the substance or mixture

|                         |                          |
|-------------------------|--------------------------|
| Acute toxicity (oral)   | Acute Tox. 4 — H302      |
| Skin irritation         | Skin Irrit. 2 — H315     |
| Skin sensitisation      | Skin Sens. 1 — H317      |
| Reproductive toxicity   | Repr. 1A — H360          |
| Aquatic hazard, acute   | Aquatic Acute 1 — H400   |
| Aquatic hazard, chronic | Aquatic Chronic 2 — H411 |

Classification calculated by Eco Candle Project with the CLP calculation method (Regulation (EC) No 1272/2008), using the upper limit of each concentration range declared by the manufacturer, which coincides with the exact values of the manufacturer's allergen declaration and IFRA certificate (benzyl benzoate 24.3%, hexyl cinnamal 4.6%). In addition to the manufacturer's classification (H302, H315, H317, H360, H411), Aquatic Acute 1 — H400 is applied because the sum of Aquatic Acute 1 components (benzyl benzoate, orange oil, d-limonene, allyl cyclohexylpropionate, allyl heptanoate, camphene) exceeds 25% at the upper limits of the declared ranges. The reproductive toxicity classification (H360) results from distilled lime oil (Repr. 1A, 0.4–0.8%), above the 0.3% generic limit; the pure fragrance is therefore reserved for professional users. The diluted preparations ( $\leq 10\%$ ) contain at most 0.08% and are not classified for reproductive toxicity. The manufacturer has not issued SDSs for diluted preparations — the classifications of the 5%, 10% and 7% preparations were calculated by Eco Candle Project. Because the IFRA Category 10A limit is 7.81%, the diffuser preparation was calculated at 7% in Augéo

Clean Multi instead of 25%.

| <b>Supplemental information</b>      | EUH208 Contains Lime oil, distilled, Litsea cubeba oil, Cyclamen aldehyde, Triplal (2,4-dimethylcyclohex-3-ene-1-carbaldehyde). May produce an allergic reaction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Precautionary statements</b>      | P201 Obtain special instructions before use.<br>P202 Do not handle until all safety precautions have been read and understood.<br>P261 Avoid breathing mist/vapours/spray.<br>P273 Avoid release to the environment.<br>P280 Wear protective gloves/eye protection/face protection.<br>P301+P312 IF SWALLOWED: Call a POISON CENTER/doctor if you feel unwell.<br>P302+P352 IF ON SKIN: Wash with plenty of water.<br>P308+P313 IF exposed or concerned: Get medical advice/attention.<br>P333+P313 If skin irritation or rash occurs: Get medical advice/attention.<br>P391 Collect spillage.<br>P405 Store locked up.<br>P501 Dispose of contents/container in accordance with local regulations. |
| <b>Finished product</b>              | Candles: also apply the safety labelling of EN 15494. When supplied to consumers add P101/P102 and the name, address and telephone of the supplier.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## 2.3 Other hazards

The mixture contains no Substances of Very High Concern (SVHC)  $\geq 0.1\%$ , no PBT/vPvB substances (REACH Annex XIII) and no substances with endocrine-disrupting properties  $\geq 0.1\%$  (Delegated Regulation (EU) 2017/2100 / Regulation (EU) 2018/605).

## SECTION 3: Composition/information on ingredients

### 3.2 Mixtures

Mixture of fragrance substances. Hazardous components (and substances with a workplace exposure limit) as declared by the manufacturer:

Full text of H-statements: see Section 16.

**SECTION 4: First aid measures**

|                                |                                                                                                                                                                  |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye contact</b>             | Rinse cautiously with water for at least 15 minutes, holding eyelids open. Remove contact lenses if easy to do. If eye irritation persists, seek medical advice. |
| <b>Skin contact</b>            | Remove contaminated clothing. Wash skin with plenty of soap and water. If skin irritation or rash occurs, seek medical advice.                                   |
| <b>Inhalation</b>              | Move the person to fresh air and keep at rest. If symptoms persist, seek medical advice.                                                                         |
| <b>Ingestion</b>               | Rinse mouth. Do NOT induce vomiting. Contact the Poison Centre (CIAV 800 250 250) or a doctor.                                                                   |
| <b>Most important symptoms</b> | Skin irritation. May cause an allergic skin reaction. May damage fertility or the unborn child.                                                                  |
| <b>Medical attention</b>       | Treat symptomatically.                                                                                                                                           |

**SECTION 5: Firefighting measures**

|                                       |                                                                                                              |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>   | Foam, dry chemical powder, carbon dioxide (CO <sub>2</sub> ).                                                |
| <b>Unsuitable extinguishing media</b> | Water jet.                                                                                                   |
| <b>Special hazards</b>                | Combustion may release smoke, CO and CO <sub>2</sub> . Prevent run-off from entering drains or watercourses. |
| <b>Advice for firefighters</b>        | Self-contained breathing apparatus and full protective clothing.                                             |

**SECTION 6: Accidental release measures**

|                                    |                                                                                                                      |
|------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>Personal precautions</b>        | Wear gloves and eye protection. Ensure ventilation. Remove ignition sources.                                         |
| <b>Environmental precautions</b>   | Prevent entry into drains, watercourses or soil.                                                                     |
| <b>Containment and cleaning up</b> | Absorb with inert material (sand, diatomaceous earth, universal binder) and place in closed containers for disposal. |

**SECTION 7: Handling and storage**

|                              |                                                                                                                                                                                                                                                                                                             |
|------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>7.1 Safe handling</b>     | Obtain special instructions before use; do not handle until all safety precautions have been read and understood. Avoid contact with skin and eyes; do not breathe vapours. Keep away from heat, ignition sources and naked flames. Do not eat, drink or smoke in the work area. Wash hands after handling. |
| <b>7.2 Storage</b>           | Keep container tightly closed in a cool, dry, well-ventilated place (10–25 °C), protected from light, heat and ignition sources. Keep out of reach of children. Store locked up.                                                                                                                            |
| <b>7.3 Specific end uses</b> | See Section 1.2 and the IFRA certificate.                                                                                                                                                                                                                                                                   |

**SECTION 8: Exposure controls/personal protection**

|                               |                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>8.1 Control parameters</b> | Exposure limits listed by the manufacturer: d-Limonene, CAS 5989-27-5 — Germany (TRGS 900) AGW 28 mg/m <sup>3</sup> / 5 ppm; Finland HTP 140 mg/m <sup>3</sup> / 25 ppm (8 h); Benzyl acetate, CAS 140-11-4 — Portugal: 10 ppm (8 h TWA); Isopentyl acetate, CAS 123-92-2 — EU IOELV / Portugal: 270 mg/m <sup>3</sup> – 50 ppm (8 h TWA); 540 mg/m <sup>3</sup> – 100 ppm (STEL). DNEL/PNEC: not available for the mixture. |
| <b>Engineering controls</b>   | Adequate general ventilation; local exhaust for heated or large-scale operations. Eyewash available.                                                                                                                                                                                                                                                                                                                         |
| <b>Eye/face protection</b>    | Safety glasses with side shields or goggles (EN 166).                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Hand protection</b>        | Chemical-resistant nitrile gloves (EN ISO 374), ≥ 0.2 mm.                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Respiratory protection</b> | Not required with adequate ventilation; otherwise filter type A (EN 14387).                                                                                                                                                                                                                                                                                                                                                  |

**SECTION 9: Physical and chemical properties**

|                            |                                                                                                                |
|----------------------------|----------------------------------------------------------------------------------------------------------------|
| <b>Physical state</b>      | Liquid                                                                                                         |
| <b>Colour</b>              | Light yellow to amber                                                                                          |
| <b>Odour</b>               | Characteristic — tropical fruity-gourmand (pineapple, coconut, rum, citrus)                                    |
| <b>Flash point</b>         | 73 °C                                                                                                          |
| <b>Flammability</b>        | Not classified (flash point > 60 °C)                                                                           |
| <b>pH</b>                  | Not applicable                                                                                                 |
| <b>Solubility in water</b> | Practically insoluble                                                                                          |
| <b>Other properties</b>    | Melting/boiling point, density, vapour pressure, viscosity, auto-ignition: not determined by the manufacturer. |

**SECTION 10: Stability and reactivity**

|                                |                                                                                  |
|--------------------------------|----------------------------------------------------------------------------------|
| <b>Reactivity / stability</b>  | Stable under normal conditions of use and storage. No dangerous reactions known. |
| <b>Conditions to avoid</b>     | Heat, flames, ignition sources.                                                  |
| <b>Incompatible materials</b>  | Strong oxidising agents.                                                         |
| <b>Hazardous decomposition</b> | In case of combustion: CO, CO <sub>2</sub> and smoke.                            |

**SECTION 11: Toxicological information**

|                                            |                                    |
|--------------------------------------------|------------------------------------|
| <b>Acute toxicity (oral)</b>               | Not classified (ATE ≈ 1,325 mg/kg) |
| <b>Skin corrosion/irritation</b>           | Skin Irrit. 2 — H315               |
| <b>Eye irritation</b>                      | Not classified                     |
| <b>Skin sensitisation</b>                  | Skin Sens. 1 — H317                |
| <b>Aspiration hazard</b>                   | Not classified                     |
| <b>Reproductive toxicity</b>               | Repr. 1A — H360                    |
| <b>Mutagenicity, carcinogenicity, STOT</b> | Not classified                     |

**SECTION 12: Ecological information**

|                      |                                                                                                                                                                          |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>12.1 Toxicity</b> | Aquatic Acute 1 — H400; Aquatic Chronic 2 — H411. Main contributors: allyl cyclohexylpropionate, benzyl benzoate, camphene, ethylene brassylate and lime oil, distilled. |
| <b>12.2-12.7</b>     | No data for the mixture. No PBT/vPvB or endocrine-disrupting substances ≥ 0.1%. Do not allow to enter drains or watercourses.                                            |

**SECTION 13: Disposal considerations**

|                                     |                                                                                                                   |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Product</b>                      | Dispose of through a licensed waste operator according to local/national regulations. Do not discharge to drains. |
| <b>Hazardous properties (waste)</b> | HP4, HP6, HP10, HP13, HP14                                                                                        |
| <b>Contaminated packaging</b>       | Empty completely; do not reuse; dispose of as unused product.                                                     |

**SECTION 14: Transport information**

|                            | ADR / RID                                                                        | IMDG                                                                             | IATA                                                                             |
|----------------------------|----------------------------------------------------------------------------------|----------------------------------------------------------------------------------|----------------------------------------------------------------------------------|
| 14.1 UN number             | UN 3082                                                                          | UN 3082                                                                          | UN 3082                                                                          |

| 14.4 Packing group         | III                                                                              | III                                                                              | III                                                                              |
| 14.5 Environmental hazards | Yes                                                                              | Yes — marine pollutant                                                           | Yes                                                                              |

14.6 Special precautions: ADR tunnel code (-); limited quantity 5 L/5 kg; packages ≤ 5 L/5 kg are exempt from the environmentally hazardous substance provisions (ADR SP 375, IMDG 2.10.2.7). 14.7 Bulk (IMO): not applicable.

**SECTION 15: Regulatory information**

|                                      |                                                                                                                                                                                                                                                                       |
|--------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>EU regulations</b>                | Regulation (EC) No 1272/2008 (CLP); Regulation (EC) No 1907/2006 (REACH); Regulation (EU) 2020/878.                                                                                                                                                                   |
| <b>SVHC / Annex XIV / Annex XVII</b> | No SVHC ≥ 0.1%; no Annex XIV substances. Annex XVII entry 30 (Repr. 1A ≥ 0.3%): the pure fragrance must not be placed on the market for supply to the general public; the packaging must be marked visibly, legibly and indelibly "Restricted to professional users". |
| <b>Seveso III</b>                    | E1 — Hazardous to the aquatic environment, Acute 1 / Chronic 1.                                                                                                                                                                                                       |
| <b>PCN / UFI</b>                     | UFI M9QW-14UW-700U-9MCH (manufacturer's notification).                                                                                                                                                                                                                |
| <b>IFRA (50th)</b>                   | Candles (Cat. 12): no restriction (100%). Reed diffusers (Cat. 10A): max 7.81%. Room sprays (Cat. 10B): max 49.38%. Fine fragrance (Cat. 4): max 19.75%. See IFRA certificate.                                                                                        |

**SECTION 16: Other information**

|                      |                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Revision</b>      | Version 1.0 — Eco Candle Project edition, 21/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 1.0 of 03/05/2023, issued 03/05/2023), allergen declaration and IFRA 50th Amendment certificate (05/05/2023). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range. |
| <b>Abbreviations</b> | ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.                                                                                                                                                                                                            |

**Full text of H-statements (Sections 2 and 3):**

**H226** Flammable liquid and vapour. **H228** Flammable solid. **H301** Toxic if swallowed. **H302** Harmful if swallowed. **H304** May be fatal if swallowed and enters airways. **H311** Toxic in contact with skin. **H312** Harmful in contact with skin. **H315** Causes skin irritation. **H317** May cause an allergic skin reaction. **H319** Causes serious eye irritation. **H330** Fatal if inhaled. **H331** Toxic if inhaled. **H332** Harmful if inhaled. **H360** May damage fertility or the unborn child. **H360FD** May damage fertility. May damage the unborn child. **H400** Very toxic to aquatic life. **H410** Very toxic to aquatic life with long lasting effects. **H411** Toxic to aquatic life with long lasting effects. **H412** Harmful to aquatic life with long lasting effects.
