

## SAFETY DATA SHEET

WHITE TEA & ALOE VERA — fragrance compound, 100%

According to Regulation (EC) No 1907/2006 (REACH), Annex II, as amended by Regulation (EU) 2020/878

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

|                 |                       |
|-----------------|-----------------------|
| Product form    | Mixture               |
| Trade name      | WHITE TEA & ALOE VERA |
| UFI             | QN5N-ECSR-R006-5GRQ   |
| Type of product | Perfumes, fragrances  |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

|                      |                                                                                                                                           |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Identified uses      | Fragrance compound for the manufacture of candles, wax melts, diffusers and air-care products. For professional use.                      |
| Uses advised against | Not for personal use. Not for direct application to skin. Cosmetic use only within the IFRA limits and with a cosmetic safety assessment. |

#### 1.3 Details of the supplier of the safety data sheet

|         |                                                              |
|---------|--------------------------------------------------------------|
| Company | VEGTEAM, Lda. — Eco Candle Project                           |
| Address | R. Quinta de Santa Marta, Lojas EF, 1495-171 Algés, Portugal |
| E-mail  | info@ecocandleproject.com                                    |
| Website | www.ecocandleproject.com                                     |

#### 1.4 Emergency telephone number

|                  |                                                                  |
|------------------|------------------------------------------------------------------|
| Emergency number | CIAV — Poison Information Centre (INEM): +351 800 250 250 (24 h) |
|------------------|------------------------------------------------------------------|

### SECTION 2: Hazards identification

#### 2.1 Classification of the substance or mixture

|                         |                          |
|-------------------------|--------------------------|
| Skin irritation         | Skin Irrit. 2 — H315     |
| Eye irritation          | Eye Irrit. 2 — H319      |
| Skin sensitisation      | Skin Sens. 1 — H317      |
| Aquatic hazard, acute   | Aquatic Acute 1 — H400   |
| Aquatic hazard, chronic | Aquatic Chronic 1 — H410 |

Classification according to Regulation (EC) No 1272/2008 [CLP], as given in the manufacturer's SDS (calculation method); verified by Eco Candle Project with the same method.

#### 2.2 Label elements

GHS07

GHS09

|                               |                                                                                                           |
|-------------------------------|-----------------------------------------------------------------------------------------------------------|
| Hazard pictograms             | GHS07, GHS09                                                                                              |
| Signal word                   | WARNING                                                                                                   |
| Contains (hazard-determining) | Tetramethyl acetyloctahydronaphthalenes (OTNE), Linalool, Ethyl linalool (3,7-dimethylnona-1,6-dien-3-ol) |

|                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Hazard statements</b>        | H315 Causes skin irritation.<br>H317 May cause an allergic skin reaction.<br>H319 Causes serious eye irritation.<br>H400 Very toxic to aquatic life.<br>H410 Very toxic to aquatic life with long lasting effects.                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Supplemental information</b> | EUH208 Contains Citral, Benzyl salicylate, Geraniol, Cedrol methyl ether (cedramber), Hexyl cinnamal, Nerol, Geranyl acetate, (Ethoxymethoxy)cyclododecane, Linalyl acetate, Eucalyptol (1,8-cineole), Dihydro pentamethylindanone, d-Limonene, Dodecanal, Guaiac wood oil (Bulnesia sarmientoi), Bergamot oil. May produce an allergic reaction.                                                                                                                                                                                                                                                                   |
| <b>Precautionary statements</b> | P261 Avoid breathing mist/vapours/spray.<br>P273 Avoid release to the environment.<br>P280 Wear protective gloves/eye protection/face protection.<br>P302+P352 IF ON SKIN: Wash with plenty of water.<br>P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br>P333+P313 If skin irritation or rash occurs: Get medical advice/attention.<br>P337+P313 If eye irritation persists: Get medical advice/attention.<br>P391 Collect spillage.<br>P501 Dispose of contents/container in accordance with local regulations. |
| <b>Finished product</b>         | Candles: also apply the safety labelling of EN 15494. When supplied to consumers add P101/P102 and the name, address and telephone of the supplier.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

### 2.3 Other hazards

The mixture contains no Substances of Very High Concern (SVHC)  $\geq 0.1\%$ , no PBT/vPvB substances (REACH Annex XIII) and no substances with endocrine-disrupting properties  $\geq 0.1\%$  (Delegated Regulation (EU) 2017/2100 / Regulation (EU) 2018/605).

## SECTION 3: Composition/information on ingredients

### 3.2 Mixtures

Mixture of fragrance substances. Hazardous components (and substances with a workplace exposure limit) as declared by the manufacturer:

Full text of H-statements: see Section 16.

**SECTION 4: First aid measures**

|                                |                                                                                                                                                                  |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye contact</b>             | Rinse cautiously with water for at least 15 minutes, holding eyelids open. Remove contact lenses if easy to do. If eye irritation persists, seek medical advice. |
| <b>Skin contact</b>            | Remove contaminated clothing. Wash skin with plenty of soap and water. If skin irritation or rash occurs, seek medical advice.                                   |
| <b>Inhalation</b>              | Move the person to fresh air and keep at rest. If symptoms persist, seek medical advice.                                                                         |
| <b>Ingestion</b>               | Rinse mouth. Do NOT induce vomiting. Contact the Poison Centre (CIAV 800 250 250) or a doctor.                                                                   |
| <b>Most important symptoms</b> | Eye irritation. Skin irritation. May cause an allergic skin reaction.                                                                                            |
| <b>Medical attention</b>       | Treat symptomatically.                                                                                                                                           |

**SECTION 5: Firefighting measures**

|                                       |                                                                                                              |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>   | Foam, dry chemical powder, carbon dioxide (CO <sub>2</sub> ).                                                |
| <b>Unsuitable extinguishing media</b> | Water jet.                                                                                                   |
| <b>Special hazards</b>                | Combustion may release smoke, CO and CO <sub>2</sub> . Prevent run-off from entering drains or watercourses. |
| <b>Advice for firefighters</b>        | Self-contained breathing apparatus and full protective clothing.                                             |

**SECTION 6: Accidental release measures**

|                                    |                                                                                                                      |
|------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>Personal precautions</b>        | Wear gloves and eye protection. Ensure ventilation. Remove ignition sources.                                         |
| <b>Environmental precautions</b>   | Prevent entry into drains, watercourses or soil.                                                                     |
| <b>Containment and cleaning up</b> | Absorb with inert material (sand, diatomaceous earth, universal binder) and place in closed containers for disposal. |

**SECTION 7: Handling and storage**

|                              |                                                                                                                                                                                           |
|------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>7.1 Safe handling</b>     | Avoid contact with skin and eyes; do not breathe vapours. Keep away from heat, ignition sources and naked flames. Do not eat, drink or smoke in the work area. Wash hands after handling. |
| <b>7.2 Storage</b>           | Keep container tightly closed in a cool, dry, well-ventilated place (10–25 °C), protected from light, heat and ignition sources. Keep out of reach of children.                           |
| <b>7.3 Specific end uses</b> | See Section 1.2 and the IFRA certificate.                                                                                                                                                 |

**SECTION 8: Exposure controls/personal protection**

|                               |                                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>8.1 Control parameters</b> | Exposure limits listed by the manufacturer: d-Limonene, CAS 5989-27-5 — Germany (TRGS 900) AGW 28 mg/m <sup>3</sup> / 5 ppm; Finland HTP 140 mg/m <sup>3</sup> / 25 ppm (8 h); Citral, CAS 5392-40-5 — Portugal: 5 ppm (8 h TWA, inhalable fraction and vapour; dermal sensitiser); Camphor, CAS 76-22-2 — Portugal: 2 ppm (8 h TWA); 3 ppm (STEL). DNEL/PNEC: not available for the mixture. |
| <b>Engineering controls</b>   | Adequate general ventilation; local exhaust for heated or large-scale operations. Eyewash available.                                                                                                                                                                                                                                                                                          |
| <b>Eye/face protection</b>    | Safety glasses with side shields or goggles (EN 166).                                                                                                                                                                                                                                                                                                                                         |
| <b>Hand protection</b>        | Chemical-resistant nitrile gloves (EN ISO 374), ≥ 0.2 mm.                                                                                                                                                                                                                                                                                                                                     |
| <b>Respiratory protection</b> | Not required with adequate ventilation; otherwise filter type A (EN 14387).                                                                                                                                                                                                                                                                                                                   |

**SECTION 9: Physical and chemical properties**

|                            |                                                                                                                |
|----------------------------|----------------------------------------------------------------------------------------------------------------|
| <b>Physical state</b>      | Liquid                                                                                                         |
| <b>Colour</b>              | Light yellow to amber                                                                                          |
| <b>Odour</b>               | Characteristic — fresh green-floral (white tea, aloe, bergamot, soft florals, woody musk)                      |
| <b>Flash point</b>         | > 93.3 °C                                                                                                      |
| <b>Flammability</b>        | Not classified (flash point > 60 °C)                                                                           |
| <b>pH</b>                  | Not applicable                                                                                                 |
| <b>Solubility in water</b> | Practically insoluble                                                                                          |
| <b>Other properties</b>    | Melting/boiling point, density, vapour pressure, viscosity, auto-ignition: not determined by the manufacturer. |

**SECTION 10: Stability and reactivity**

|                                |                                                                                  |
|--------------------------------|----------------------------------------------------------------------------------|
| <b>Reactivity / stability</b>  | Stable under normal conditions of use and storage. No dangerous reactions known. |
| <b>Conditions to avoid</b>     | Heat, flames, ignition sources.                                                  |
| <b>Incompatible materials</b>  | Strong oxidising agents.                                                         |
| <b>Hazardous decomposition</b> | In case of combustion: CO, CO <sub>2</sub> and smoke.                            |

**SECTION 11: Toxicological information**

|                                                                   |                                    |
|-------------------------------------------------------------------|------------------------------------|
| <b>Acute toxicity (oral)</b>                                      | Not classified (ATE ≈ 6,565 mg/kg) |
| <b>Skin corrosion/irritation</b>                                  | Skin Irrit. 2 — H315               |
| <b>Eye irritation</b>                                             | Eye Irrit. 2 — H319                |
| <b>Skin sensitisation</b>                                         | Skin Sens. 1 — H317                |
| <b>Aspiration hazard</b>                                          | Not classified                     |
| <b>Mutagenicity, carcinogenicity, reproductive toxicity, STOT</b> | Not classified                     |

**SECTION 12: Ecological information**

|                      |                                                                                                                                                                                                                         |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>12.1 Toxicity</b> | Aquatic Acute 1 — H400; Aquatic Chronic 1 — H410. Main contributors: tetramethyl acetyloctahydronaphthalenes (OTNE), hexamethylindanopyran (HHCB), benzyl benzoate, cedrol methyl ether (cedramber) and hexyl cinnamal. |
| <b>12.2-12.7</b>     | No data for the mixture. No PBT/vPvB or endocrine-disrupting substances ≥ 0.1%. Do not allow to enter drains or watercourses.                                                                                           |

**SECTION 13: Disposal considerations**

|                                     |                                                                                                                   |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Product</b>                      | Dispose of through a licensed waste operator according to local/national regulations. Do not discharge to drains. |
| <b>Hazardous properties (waste)</b> | HP4, HP13, HP14                                                                                                   |
| <b>Contaminated packaging</b>       | Empty completely; do not reuse; dispose of as unused product.                                                     |

## SECTION 14: Transport information

## SECTION 16: Other information

|               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Revision      | Version 1.0 — Eco Candle Project edition, 22/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 1.0 of 30/07/2025, issued 01/08/2024), allergen declaration and IFRA 51st Amendment certificate (27/08/2024). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively with the upper limit of each range and, for the declared allergens, the exact values of the manufacturer's allergen declaration and IFRA certificate (benzyl benzoate 16.36%, linalool 11.18%, citral 0.80%, benzyl salicylate 0.7%, geraniol 0.60%, hexyl cinnamal 0.6%, limonene 0.32% — total limonene, including that contributed by citrus oils). The calculation reproduces the manufacturer's classification of the pure fragrance (H315, H317, H319, H400, H410). The 5% and 10% preparations coincide with the manufacturer's SDSs for those dilutions in dipropylene glycol (H317, H412; H317, H411). The manufacturer's revision of 30/07/2025 keeps the composition of the 01/08/2024 version unchanged and only updates the classification of minor components (benzaldehyde ≤ 0.04%), with no effect on the mixture. Because the IFRA Category 10A limit is 11.61%, the diffuser preparation was calculated at 11% in Augeo Clean Multi instead of 25%; Augeo Clean Multi adds Eye Irrit. 2 — H319. |
| Abbreviations | ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; HHCB = hexamethylindanopyran; SVHC = Substance of Very High Concern.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Full text of H-statements (Sections 2 and 3):

**H225** Highly flammable liquid and vapour. **H226** Flammable liquid and vapour. **H228** Flammable solid. **H302** Harmful if swallowed. **H304** May be fatal if swallowed and enters airways. **H315** Causes skin irritation. **H317** May cause an allergic skin reaction. **H318** Causes serious eye damage. **H319** Causes serious eye irritation. **H331** Toxic if inhaled. **H332** Harmful if inhaled. **H335** May cause respiratory irritation. **H336** May cause drowsiness or dizziness. **H361** Suspected of damaging fertility or the unborn child. **H361d** Suspected of damaging the unborn child. **H371** May cause damage to organs. **H373** May cause damage to organs through prolonged or repeated

exposure. **H400** Very toxic to aquatic life. **H410** Very toxic to aquatic life with long lasting effects. **H411** Toxic to aquatic life with long lasting effects. **H412** Harmful to aquatic life with long lasting effects.
