

## SAFETY DATA SHEET

FIRE ROASTED CHESTNUTS — 10% preparation in non-hazardous wax base

According to Regulation (EC) No 1907/2006 (REACH), Annex II, as amended by Regulation (EU) 2020/878

⚠ **NOTE:** This document applies to the final mixture containing 10% of FIRE ROASTED CHESTNUTS fragrance and 90% of non-hazardous wax base. Classification calculated by Eco Candle Project from the composition declared in the manufacturer's SDS for the pure fragrance (CLP calculation method, Regulation (EC) No 1272/2008, Annex I).

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

## 1.1 Product identifier

|                      |                                                                                   |
|----------------------|-----------------------------------------------------------------------------------|
| Product form         | Mixture                                                                           |
| Trade name           | Preparation with FIRE ROASTED CHESTNUTS at 10%                                    |
| UFI (pure fragrance) | J8Q2-J2XX-Y00X-GA7H                                                               |
| Type of product      | Perfumes, fragrances                                                              |
| Base                 | Non-hazardous, non-classified wax (e.g. soy, rapeseed, coconut or paraffin) — 90% |

## 1.2 Relevant identified uses of the substance or mixture and uses advised against

|                      |                                                                                                                                           |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Identified uses      | Scented candles, wax melts and scented waxes.                                                                                             |
| Uses advised against | Not for personal use. Not for direct application to skin. Cosmetic use only within the IFRA limits and with a cosmetic safety assessment. |

## 1.3 Details of the supplier of the safety data sheet

|         |                                                              |
|---------|--------------------------------------------------------------|
| Company | VEGTEAM, Lda. — Eco Candle Project                           |
| Address | R. Quinta de Santa Marta, Lojas EF, 1495-171 Algés, Portugal |
| E-mail  | info@ecocandleproject.com                                    |

## SECTION 2: Hazards identification

## 2.1 Classification of the substance or mixture

|                          |                                                                                                                                                                                                                                                                               |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Result                   | MIXTURE CLASSIFIED AS HAZARDOUS — H317, H412                                                                                                                                                                                                                                  |
| Aquatic hazard, chronic  | Aquatic Chronic 3 — H412. $10 \times M \times \Sigma \text{Chronic 1} + \Sigma \text{Chronic 2} = 8.1\%$ ( $\geq 25\% \rightarrow \text{Chronic 2}$ ); $100 \times M \times \Sigma \text{Chronic 1} + 10 \times \Sigma \text{Chronic 2} + \Sigma \text{Chronic 3} = 81.2\%$ . |
| Skin sensitisation       | Skin Sens. 1 — H317. Cinnamal 0.60% is $\geq$ the concentration limit (Cinnamal: 0.10% generic).                                                                                                                                                                              |
| Eye irritation           | Not classified — $\Sigma \text{Eye Irrit. 2} (\geq 1\%) = 0.00\%$ (threshold: 10%).                                                                                                                                                                                           |
| Skin irritation          | Not classified — $\Sigma \text{Skin Irrit. 2} (\geq 1\%) = 0.00\%$ (threshold: 10%).                                                                                                                                                                                          |
| Aspiration hazard        | Not classified — $\Sigma \text{Asp. Tox. 1} = 0.00\%$ (threshold: 10%).                                                                                                                                                                                                       |
| Acute toxicity (oral)    | Not classified — ATE mix $\approx 5,903 \text{ mg/kg}$ (threshold: 2000 mg/kg).                                                                                                                                                                                               |
| Notes                    | The pure fragrance (100%) is classified H302, H317, H319, H400 and H411 (WARNING). See Annex — Calculation record.                                                                                                                                                            |
| Manufacturer cross-check | Consistent with the manufacturer's SDS for the 10% dilution: H317, H412.                                                                                                                                                                                                      |

Full text of H-statements: see Section 16.

#### SECTION 4: First aid measures

|                                |                                                                                                                                                                                                                                            |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye contact</b>             | Rinse cautiously with water for at least 15 minutes, holding eyelids open. Remove contact lenses if easy to do. If eye irritation persists, seek medical advice.                                                                           |
| <b>Skin contact</b>            | Remove contaminated clothing. Wash skin with plenty of soap and water. If skin irritation or rash occurs, seek medical advice. Molten wax: cool immediately with cold water; do not remove adhering wax; seek medical attention for burns. |
| <b>Inhalation</b>              | Move the person to fresh air and keep at rest. If symptoms persist, seek medical advice.                                                                                                                                                   |
| <b>Ingestion</b>               | Rinse mouth. Do NOT induce vomiting. Contact the Poison Centre (CIAV 800 250 250) or a doctor.                                                                                                                                             |
| <b>Most important symptoms</b> | May cause an allergic skin reaction.                                                                                                                                                                                                       |
| <b>Medical attention</b>       | Treat symptomatically.                                                                                                                                                                                                                     |

#### SECTION 5: Firefighting measures

|                                       |                                                                                                              |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b>   | Foam, dry chemical powder, carbon dioxide (CO <sub>2</sub> ).                                                |
| <b>Unsuitable extinguishing media</b> | Water jet.                                                                                                   |
| <b>Special hazards</b>                | Combustion may release smoke, CO and CO <sub>2</sub> . Prevent run-off from entering drains or watercourses. |
| <b>Advice for firefighters</b>        | Self-contained breathing apparatus and full protective clothing.                                             |

#### SECTION 6: Accidental release measures

|                                    |                                                                               |
|------------------------------------|-------------------------------------------------------------------------------|
| <b>Personal precautions</b>        | Wear gloves and eye protection. Ensure ventilation. Remove ignition sources.  |
| <b>Environmental precautions</b>   | Prevent entry into drains, watercourses or soil.                              |
| <b>Containment and cleaning up</b> | Solid wax: collect mechanically. Molten wax: allow to solidify and scrape up. |

#### SECTION 7: Handling and storage

|                              |                                                                                                                                                                                                                                                                           |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>7.1 Safe handling</b>     | Melt the wax with controlled heating and good ventilation. Add the fragrance at a moderate temperature (typically 75–85 °C, or as per the wax data sheet) and below the fragrance flash point (above 93.3 °C). Do not leave melting wax unattended. Wash hands after use. |
| <b>7.2 Storage</b>           | Keep container tightly closed in a cool, dry, well-ventilated place (10–25 °C), protected from light, heat and ignition sources. Keep out of reach of children.                                                                                                           |
| <b>7.3 Specific end uses</b> | See Section 1.2 and the IFRA certificate.                                                                                                                                                                                                                                 |

**SECTION 8: Exposure controls/personal protection**

|                               |                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>8.1 Control parameters</b> | Exposure limits listed by the manufacturer: Benzaldehyde, CAS 100-52-7 — Finland HTP 4.4 mg/m <sup>3</sup> / 1 ppm (8 h), 17.4 mg/m <sup>3</sup> / 4 ppm (ceiling); Poland NDS 10 mg/m <sup>3</sup> ; Isopentyl acetate, CAS 123-92-2 — EU IOELV / Portugal: 270 mg/m <sup>3</sup> - 50 ppm (8 h TWA); 540 mg/m <sup>3</sup> - 100 ppm (STEL). DNEL/PNEC: not available for the mixture. |
| <b>Engineering controls</b>   | Adequate general ventilation; local exhaust for heated or large-scale operations. Eyewash available.                                                                                                                                                                                                                                                                                     |
| <b>Eye/face protection</b>    | Safety glasses with side shields or goggles (EN 166).                                                                                                                                                                                                                                                                                                                                    |
| <b>Hand protection</b>        | Chemical-resistant nitrile gloves (EN ISO 374), ≥ 0.2 mm. Molten wax: heat-resistant gloves (EN 407).                                                                                                                                                                                                                                                                                    |
| <b>Respiratory protection</b> | Not required with adequate ventilation; otherwise filter type A (EN 14387).                                                                                                                                                                                                                                                                                                              |

**SECTION 9: Physical and chemical properties**

|                       |                                                              |
|-----------------------|--------------------------------------------------------------|
| <b>Physical state</b> | Solid at 20 °C (wax); liquid when molten                     |
| <b>Odour</b>          | Characteristic — roasted chestnut, vanilla, cinnamon         |
| <b>Flash point</b>    | Not determined for the preparation; pure fragrance > 93.3 °C |
| <b>Density</b>        | Depends on the base                                          |
| <b>Solubility</b>     | Insoluble in water                                           |

**SECTION 10: Stability and reactivity**

|                                |                                                                                  |
|--------------------------------|----------------------------------------------------------------------------------|
| <b>Reactivity / stability</b>  | Stable under normal conditions of use and storage. No dangerous reactions known. |
| <b>Conditions to avoid</b>     | Heat, flames, ignition sources.                                                  |
| <b>Incompatible materials</b>  | Strong oxidising agents.                                                         |
| <b>Hazardous decomposition</b> | In case of combustion: CO, CO <sub>2</sub> and smoke.                            |

**SECTION 11: Toxicological information**

|                                                                   |                                    |
|-------------------------------------------------------------------|------------------------------------|
| <b>Acute toxicity (oral)</b>                                      | Not classified (ATE ≈ 5,903 mg/kg) |
| <b>Skin corrosion/irritation</b>                                  | Not classified                     |
| <b>Eye irritation</b>                                             | Not classified                     |
| <b>Skin sensitisation</b>                                         | Skin Sens. 1 — H317                |
| <b>Aspiration hazard</b>                                          | Not classified                     |
| <b>Mutagenicity, carcinogenicity, reproductive toxicity, STOT</b> | Not classified                     |

**SECTION 12: Ecological information**

|                      |                                                                                                                               |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>12.1 Toxicity</b> | Aquatic Chronic 3 — H412. Main contributors: benzyl benzoate and coumarin.                                                    |
| <b>12.2-12.7</b>     | No data for the mixture. No PBT/vPvB or endocrine-disrupting substances ≥ 0.1%. Do not allow to enter drains or watercourses. |

**SECTION 13: Disposal considerations**

|                                     |                                                                                                                   |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Product</b>                      | Dispose of through a licensed waste operator according to local/national regulations. Do not discharge to drains. |
| <b>Hazardous properties (waste)</b> | HP13, HP14                                                                                                        |
| <b>Contaminated packaging</b>       | Empty completely; do not reuse; dispose of as unused product.                                                     |

**SECTION 14: Transport information**

Not classified as dangerous goods (ADR/RID/IMDG/IATA) at 10% — Aquatic Chronic 3 is not regulated for transport. The pure fragrance (100%) is UN 3082, Class 9, PG III. Finished candles are articles and are not regulated.

**SECTION 15: Regulatory information**

|                                      |                                                                                                                                                                                                                                                                                                                                     |
|--------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>EU regulations</b>                | Regulation (EC) No 1272/2008 (CLP); Regulation (EC) No 1907/2006 (REACH); Regulation (EU) 2020/878.                                                                                                                                                                                                                                 |
| <b>SVHC / Annex XIV / Annex XVII</b> | No SVHC $\geq 0.1\%$ ; no Annex XIV substances.                                                                                                                                                                                                                                                                                     |
| <b>Drug precursors</b>               | Contains piperonal (CAS 120-57-0, 0.30%), a Category 1 scheduled substance under Regulation (EC) No 273/2004 (Annex I). The mixture is compounded so that the substance cannot be easily used or extracted; nevertheless, keep records of transactions and report any suspicious orders or transactions to the competent authority. |
| <b>PCN / UFI</b>                     | Classified for health hazards (H317): a PCN with its own UFI is required if this preparation is placed on the market; the fragrance UFI (J8Q2-J2XX-Y00X-GA7H) can be declared as a component (MiM).                                                                                                                                 |
| <b>IFRA (51st)</b>                   | Candles (Cat. 12): no restriction — 10% complies.                                                                                                                                                                                                                                                                                   |

**SECTION 16: Other information**

|                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Revision</b>      | Version 1.0 — Eco Candle Project edition, 21/10/2026. Based on the manufacturer's SDS for the pure fragrance (revision of 20/08/2024, issued 20/08/2024), allergen declaration and IFRA 51st Amendment certificate (20/08/2024). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range. Classification of the 10% preparation calculated by Eco Candle Project. |
| <b>Abbreviations</b> | ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.                                                                                                                                                                                                                                                                                 |

**Full text of H-statements (Sections 2 and 3):**

**H226** Flammable liquid and vapour. **H301** Toxic if swallowed. **H302** Harmful if swallowed. **H311** Toxic in contact with skin. **H312** Harmful in contact with skin. **H315** Causes skin irritation. **H317** May cause an allergic skin reaction. **H319** Causes serious eye irritation. **H331** Toxic if inhaled. **H400** Very toxic to aquatic life. **H411** Toxic to aquatic life with long lasting effects. **H412** Harmful to aquatic life with long lasting effects.

This information is based on our current knowledge and on the manufacturer's data and describes the product for health, safety and environmental purposes only. Users must ensure suitability for their own application. If a different base is used, the classification must be recalculated.

**ANNEX — Calculation record (10%)**

| Hazard class          | Fragrance 100%                | Calculation at 10% / threshold                | Result at 10%            |
|-----------------------|-------------------------------|-----------------------------------------------|--------------------------|
| Acute toxicity (oral) | Not classified (ATE 590)      | $ATE \approx 5,903 \text{ mg/kg} / \leq 2000$ | Not classified           |
| Aspiration hazard     | Not classified                | $\Sigma = 0.00\% / \geq 10\%$                 | Not classified           |
| Skin irritation       | Not classified                | $\Sigma = 0.00\% / \geq 10\%$                 | Not classified           |
| Eye irritation        | Eye Irrit. 2                  | $\Sigma = 0.0\% / \geq 10\%$                  | Not classified           |
| Skin sensitisation    | Skin Sens. 1                  | cinnamal 0.60% / $\geq 1\%$                   | Skin Sens. 1 — H317      |
| Aquatic acute         | Aquatic Acute 1               | $\Sigma M \times A1 = 8.0\% / \geq 25\%$      | Not classified           |
| Aquatic chronic       | Aquatic Chronic 2             | C2: 8.1%; C3: 81.2% / $\geq 25\%$             | Aquatic Chronic 3 — H412 |
| Physical hazards      | Not classified (FP > 93.3 °C) | FP > 60 °C                                    | Not classified           |

Calculated from the composition declared in the manufacturer's SDS (100%). The same method reproduces the manufacturer's classification of the pure fragrance.
