SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 28/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 1 of 16/01/2025, issued 11/02/2025), allergen declaration and IFRA 51st Amendment certificate (28/10/2026). The manufacturer declares component concentrations as ranges. Exact values derived from the manufacturer's allergen declarations were used where available (acetyl cedrene, linalool, sweet orange oil, beta-pinene, linalyl acetate, bergamot oil) and the midpoint of the range otherwise, except Chinese cedarwood oil (declared range > 1 – ≤ 5%), for which 2% was used: the manufacturer classifies the pure fragrance as Eye Irrit. 2 (H319) and not Eye Dam. 1 (H318), which places this Skin Corr. 1C component below 3%. With these values the calculation reproduces the manufacturer's classification of the pure fragrance (H315, H317, H319, H411). The calculated classifications of the 5%, 10% and 25% preparations were checked against the manufacturer's own SDSs for those dilutions. Classification of the 25% preparation calculated by Eco Candle Project.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.
