SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 20/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 13.0 of 11/03/2024, issued 13/04/2024), allergen declaration and IFRA 51st Amendment certificate (13/04/2024). The manufacturer declares component concentrations as ranges. Exact values from the manufacturer's allergen declaration were used where available (linalool, d-limonene, coumarin, rose ketone) and the upper limit of the range otherwise (conservative); with these values the calculation reproduces the manufacturer's classification of the pure fragrance (H315, H317, H318, H411). The manufacturer has not issued SDSs for diluted preparations — the classifications of the 5%, 10% and 25% preparations were calculated by Eco Candle Project with the CLP calculation method. Classification of the 5% preparation calculated by Eco Candle Project.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.
