SECTION 16: Other information

Revision	Version 1.1 — Eco Candle Project edition, 04/11/2026. Based on the manufacturer's SDS for the pure fragrance (version 1.0 of 15/02/2023, issued 15/02/2023), allergen declaration and IFRA 50th Amendment certificate (13/02/2023). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range (these upper limits coincide with the exact values in the manufacturer's allergen declaration and IFRA certificate), which reproduces the manufacturer's classification of the pure fragrance (H315, H317, H319, H411). The IFRA Category 10A limit (21.66%) does not allow a 25% reed-diffuser preparation; the diffuser safety data sheet is therefore issued for 21% fragrance in Augeo Clean Multi. The manufacturer has not issued SDSs for diluted preparations — the classifications of the 5%, 10% and 21% preparations were calculated by Eco Candle Project with the CLP calculation method. Changes from version 1.0 (21/10/2026): the generic cut-off values of Regulation (EC) No 1272/2008, Annex I, Table 1.1 are now applied in the summation method for aquatic hazards (ingredients below 1 % — or 0.1 % ÷ M for Aquatic Acute 1 / Chronic 1 — are not taken into account). 10% preparation: H317, H412 → H317. Composition, other hazard classes and IFRA limits unchanged. Classification of the 5% preparation calculated by Eco Candle Project.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; OTNE = tetramethyl acetyloctahydronaphthalenes; SVHC = Substance of Very High Concern.
