SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 21/10/2026. Based on the manufacturer's SDS for the pure fragrance (revision of 12/02/2022, issued 12/02/2022), allergen declaration and IFRA 51st Amendment certificate (01/07/2024). The manufacturer declares component concentrations as ranges; the classification was calculated conservatively using the upper limit of each range (these coincide with the values of the manufacturer's IFRA certificate), which reproduces the manufacturer's classification of the pure fragrance (H317, H411) and of the 5% preparation (not classified — EUH208). The manufacturer's SDSs for the 10% and 25% dilutions (10/2023) do not classify these preparations for the aquatic environment; they declare the cedarwood component as Cupressus funebris wood oil (Aquatic Chronic 2) instead of Texas cedarwood oil (Aquatic Chronic 1, as in the manufacturer's SDS for the pure fragrance), in the same concentration range. Eco Candle Project keeps the composition of the pure-fragrance SDS, which is the more protective one: the 10% and 25% preparations are classified Aquatic Chronic 3 — H412. Confirmation of the current composition has been requested from the manufacturer. Classification of the 5% preparation calculated by Eco Candle Project.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; HHCB = hexamethylindanopyran; SVHC = Substance of Very High Concern.
