SECTION 16: Other information

Revision	Version 1.0 — Eco Candle Project edition, 22/10/2026. Based on the manufacturer's SDS for the pure fragrance (version 1 of 07/08/2024, issued 11/02/2025), allergen declaration and IFRA 51st Amendment certificate (11/02/2025). The manufacturer declares component concentrations as ranges. Exact values derived from the manufacturer's allergen declarations were used where available (benzyl salicylate, citronellol, dimethylbenzylcarbinyl acetate, coumarin, benzyl benzoate, geranium oil, tetramethyl acetyloctahydronaphthalenes, cinnamal, benzyl cinnamate, damascone) and the midpoint of the range otherwise; with these values the calculation reproduces the manufacturer's classification of the pure fragrance (H317, H412). The calculated classifications of the 5%, 10% and 25% preparations were checked against the manufacturer's own SDSs for those dilutions. Classification of the 5% preparation calculated by Eco Candle Project.
Abbreviations	ATE = Acute Toxicity Estimate; UFI = Unique Formula Identifier; PCN = Poison Centre Notification; SCL = specific concentration limit; SVHC = Substance of Very High Concern.
